

# FT-253 Mini Element with Zen Frog Fountain

## FOUNTAIN INFORMATION:

**This fountain holds approximately 1/2 gallon of water.**

**No recommended fountain covers are available for this fountain.**

**No refill device or submersible lights are suggested for this fountain**

## Pump Kit Parts List

PK80-A pump (1)  
Approx. 6" length of 1/2" black non-kink tubing (1)  
Aluminum spiller/insert (1)  
Hose clamps (3) \*  
Adhesive Dots (4)

\* Hose clamps may be used as flow restrictors

## TOOLS REQUIRED:

Bubble Level 

## PUMP INFORMATION:

**PF75 - 75 GPH Pump**  
**6 FT cord length**

Fountain bowls/tops and other fountain components, which collect water, should not be left outside in the winter since any component that fills with water and freezes may crack. Likewise, components such as pedestals, which remain in a basin, filled with water, which then freezes, may also crack or crumble. Ideally, therefore, a fountain should always be stored indoors or in a dry protected place such as a covered porch away from the elements. However, if a fountain must be left outside:

- (1) Remove pump, stoppers, drainpipes, finials, and other small components for storage indoors. Note that stoppers or drain pipes are removed to allow drainage in the event water accumulates in any basin.
- (2) Raise fountain base from ground with wood strips so that base will not freeze to the ground surface.
- (3) Cover or wrap the fountain with burlap or other absorbent material (old blanket or towel) and then cover securely with plastic, making sure that water will not accumulate in the basin or other fountain component and freeze;
- (4) Check fountain periodically to insure that plastic is secure and water is not accumulating in any fountain component.

## - G E N E R A L   F O U N T A I N   T I P S -

**Install fountains on a level surface.** You will need a properly grounded 110-volt (AC only) GFCI protected receptacle near the fountain for your pump. All pumps are submersible and must be completely underwater to function properly. Test all pumps and adjust to full output prior to assembly. It is not recommended that fountains be placed directly on grass or dirt. Position the channel opening at the base of each fountain toward the electrical outlet to be used since the pump cord will be threaded through this opening.

## FT-253 Mini Element with Zen Frog Fountain

Assemble your fountain on a level surface capable of holding a minimum of 30 pounds with an approximate 1/2 square foot footprint.

FT-252C (17 lbs)  
11.5"L x 6"W x 6"H

FT-252B (2 lbs)  
4.5"L x 3.75"W x 4"H

FT-253A (4 lbs)  
4"L x 6"W x 4.25"H

1. Place the adhesive dots on the bottom of the basin to protect furniture surface that fountain is to be placed on.
2. Position the basin (FT-252C) where the fountain is to be installed, ensuring that it is level.
3. Using a hose clamp, secure one end of the 1/2" non-kink tubing to the pump.
4. Place the pump into the basin (FT-252C) so that the cord comes up and out the back of the fountain.
5. Using a hose clamp, place the other end of the tubing onto the pipe protruding from the bottom/inside of the pump cover (FT-252B).
6. Place the pump cover (FT-252B) into the back of the basin (FT-252C) so that the pipe protruding up from the pump cover is facing up and the pump is hidden.
7. Place the hole of the aluminum spiller/insert onto the pipe sticking up out of the pump cover so that the lip is spilling into the basin of the fountain.
8. Place the birds (FT-253A) over the spiller insert.
9. Fill the fountain with water.
