

**6654-4201 Jakarta Fountain  
(3 pieces)  
COMPONENTS AND PARTS LIST**

Revised March 29, 2016

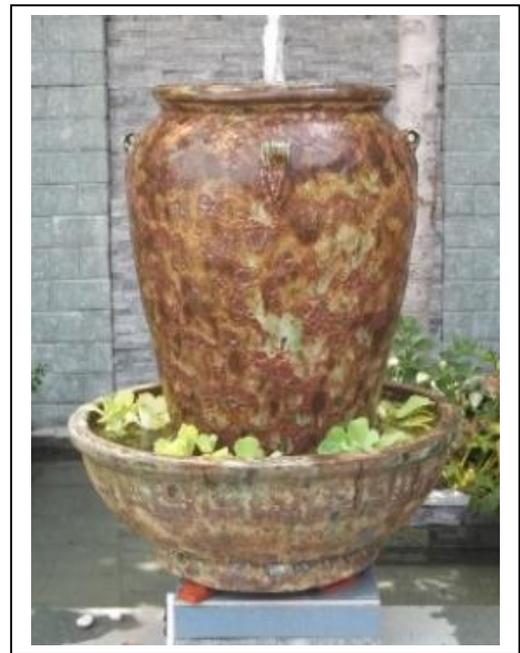

6654-4201A  
22" dia x 28" H  
135 Lbs

6652-4201B  
15" dia x 10" H  
36 Lbs

6655-4201  
32" dia x 11" H  
106 Lbs

**Fountain holds approximately  
31 gallon(s) of water**

**NOTE: Component photos are not to scale**

**Pump Kit Parts List**

- PK500 pump (1)
- Approx. 12" length of 1/2" black non-kink tubing (1)
- Approx. 2" length of 5/8" clear vinyl tubing (connected to non-kink tubing)
- #10 rubber stopper (1)
- Plumber's Putty (1)
- Wobble Wedges (4)
- Hose clamps (2)
- Note – Hose clamp may be used as flow restrictor

**Tools you will need**

# 6654-4201 Jakarta Fountain (3 pieces) ASSEMBLY INSTRUCTIONS

Revised March 30, 2016

1. Make sure you are assembling your fountain on a level surface capable of holding a minimum of 541 pounds within approximately a 1.5 square foot footprint.
2. Position the bowl (6655-4201) where the fountain is to be installed, ensuring that it is level.
3. Wrap a piece of putty around the cords where you will be placing the stopper. (Fig A)
4. Fit cords into stopper
5. Place a piece of putty inside the length of the slit in the stopper
6. Wrap putty around outside of stopper ensuring that the slit and the cord hole are covered and sealed (Fig B)
7. Press stopper firmly into the hole of basin
8. Place the pump cover (6654-4201B) inside the center of the bowl.
9. Use wedges to ensure the pump cover is level
10. Before placing water feature (6654-4201A), replace loose plastic pipe within PVC molded into the jar with clear vinyl tubing. (Fig C)
11. Place the water feature onto the pump cover making sure that the pipe protruding from the bottom goes into the hole of the pump cover.
12. Place a hose clamp over the ½" non-kink end of the tubing and place that end of the tubing onto the pump water outlet and tighten the clamp.
  - a. Note – one of the hose clamps may be placed on the tubing prior to installation as a flow restrictor if necessary.
13. Place the pump inside the pump cover.
14. Place the 5/8" clear vinyl end of the tubing over the pipe protruding from the bottom of the water feature.
15. Fill basin with approximately 31 gallons of water.
  - a. Note – do not allow pump to run dry as it will cause damage to the pump.

## WINTER CARE AND GENERAL FOUNTAIN INSTRUCTIONS

### **- W I N T E R   C A R E -**

Fountain bowls/tops and other fountain components, which collect water, should not be left outside in the winter since any component, which fills with water and freezes may crack. Likewise components such as pedestals, which remain in a basin, filled with water, which then freezes, may also crack or crumble. Ideally, therefore, a fountain should always be stored indoors or in a dry protected place such as a covered porch away from the elements. However, if a fountain must be left outside:

(1) Remove pump, rubber stoppers, drainpipes, finials, and other small components for storage indoors. Note that stoppers or drainpipes are removed to allow drainage in the event water accumulates in any basin. Compression stoppers may be left on the pump cord for easier assembly next season.

(2) Raise fountain base from ground with wood strips so that base will not freeze to the ground surface.

(3) Cover or wrap the fountain with burlap or other absorbent material (old blanket or towel) and then cover securely with plastic, making sure that water will not accumulate in the basin or other fountain component and freeze;

(4) Check fountain periodically to insure that plastic is secure and water is not accumulating in any fountain component.

### **- G E N E R A L   F O U N T A I N   T I P S -**

Install fountains on a level surface. You will need a properly grounded 110-volt (AC only) GFCI protected receptacle near the fountain for your pump. All pumps are submersible and must be completely underwater to function properly. Test all pumps and adjust to full output prior to assembly. It is not recommended that fountains be placed directly on grass or dirt. Position the channel opening at the base of each fountain toward the electrical outlet to be used since the pump cord will be threaded through this opening.
