

Shown in Onyx Black

## Lite® Collection

Lite® planters are rated for both indoor and outdoor use and frequently specified for rooftops and terraces, hospitality projects, public space installations, and restaurants. They are a great choice for jobs that do not allow for heavy-weight materials and where large scale plantings are required. Because of their light weight, fiberglass planters are easier to ship and material handle on the job. Fiberglass planters can withstand UV exposure and extreme temperatures, from high heat to frost and can tolerate the seasonal thaw cycles. Additionally, they won't corrode due to exposure or direct contact with soil. There is no need to use plastic liners with Campania's Lite® planters. Although we recommend that you take advantage of the quick turnaround of our stocked product; these shapes, finishes, and/or sizes are not always right for every job. Campania has the capability to produce custom shapes, sizes, and colors in our Vietnamese factory. All recommended commercial products and CAD files can be viewed at [www.campaniainternational.com/projects](http://www.campaniainternational.com/projects). Our full line can be viewed online at [www.campaniainternational.com/liteproducts](http://www.campaniainternational.com/liteproducts).
